Homopath WildFire - Homeopathic Software [April-2022]

Homopath WildFire is a homeopathic application designed for doctors to help them record patient symptoms and filter remedies. Complex and encompassing interface Similar to Windows Office's layout, the program carries a complex design which allows medics to organize lists of patients, case records, and patient history with the help of graphs and statistics. The aspect and available features implemented in the GUI are impressive to say the least. Just like in Microsoft Word's layout, they can sort out, categorize, and filter their patients and remedies based on their illness record, temperament, and medicine. Additionally, they can also use a huge internal database which acts as a browser that educates and evaluates them, besides helping them offer treatment to their patients. Impressive amount of features Doctors treating homeopathic patients can enjoy many various methods to make their work more efficiently. Besides having the big repertory of medical knowledge, Homopath WildFire allows medics to tweak basic settings, like the app's theme color, and lets them add or remove data about the physician in charge. Additionally, they can use the 'Materia Medica' feature in order to categorize the drugs needed by patients in the so-called 'drug ranges.' Users can also play media in a special tab that allows them to view pictures, watch videos, and listen to audio files. A bit unusual for a professional homeopathic program, the media tab may come in handy when serious illness is concerned or patients need to send to their doctors some pictures with their skin issues and can't make it to the clinic. Conclusion Homopath WildFire is a vast and all-encompassing software application which carries all the possible features needed to treat patients in the most efficient way possible. From great patient and case record filters to a huge, readily available database, the utility provides the best medical platform a homeopathic doctor will ever need. Homopath WildFire -

Homeopathic Remedy For All This is an excellent program. I have been using it for years. It is not very expensive. I've been trying to find it for years. Thank you. I am now using the program for the Materia Medica which I have been looking for

What's New in the?

Homeopath with WildFire is a comprehensive and intelligent homeopathic treatment platform that is driven by your patients' experiences. With a database that contains over 5,000 human experiences, Homepath WildFire allows you to see trends, handle treatment, and be more proactive when dealing with your practice. It gives you a 360° view of your practice, allowing you to keep your hands on the pulse of your practice without having to spend time searching for information. You can keep your eyes on your patients and your mind on the drug, but you can still keep a database of your success. Features: Patient & Case Record Filtering True data filtering and patient search for case record and current patients! Specify treatment instructions. Specify what to do, when, why and how. Manage your patients via a Google map interface or the rest of the app, as well as the option to export their medical history. See all relevant information about each patient at your fingertips! As a homeopathic application, keep a balance with a standard interface and detailed description. Vague descriptions? Upload your own descriptions (new as of V4). Full audio description of symptoms (new as of V4) Provides a standardized system for recording your patient symptoms. Single

patient records allow you to store all your information and data in a single record. Multiple patient records allow you to quickly and easily copy-and-paste results from different patient records, while also allowing you to add new results to your database. You can also use the full text search feature, which allows you to search words in any texts (new as of V4). A streamlined and user-friendly interface. Create a patient group (a category) for each of your patients. True data filtering and patient search for case record and current patients! Create groups of patients who suffer from the same illness, age, gender, specific symptoms, or other statistics. Define groups of patients as a treatment. Define contact methods. Manage your patients via a Google map interface or the rest of the app, as well as the option to export their medical history. See all relevant information about each patient at your fingertips! Patient and case records from your previous visits are always available in the patient registry. As a homeopathic application, keep a balance with a standard interface and detailed description. V
